Journal Name:	International Research Journal of Gastroenterology and Hepatology
Manuscript Number:	Ms_IRJGH_120661
Title of the Manuscript:	Expert perspectives on the prescription practice of esomeprazole alone or in combination with domperidone for acid peptic disease management in Indian settings
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	Esomeprazole alone or in combination with Domperidone has been under consideration in this paper. Uses of Domperidone+Esomeprazole Domperidone+Esomeprazole is used to treat gastrointestinal reflux disease (GERD). Liked Points 1.The strong preference for esomeprazole, highlighted by its superior acid control and low incidence of side effects, corroborates its efficacy and reliability. 2.The methodology used, statistical survey, Risk factors involved, The Discussion involved and Conclusion is useful for scientific study for further studies. 3. The majority of the current respondents indicated esomeprazole as their preferred proton PPI for treating APD. 4. Esomeprazole has demonstrated superior acid control, maintaining intragastric pH for extended durations compared to other PPIs.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Yes it is comprehensive, with Objectives, methods, results and conclusion being written.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	Yes, it is scientifically correct with 1. Discussions of affects of Both drugs together and individual ones. 2. Risk factors involved are discussed. 3. Statistical Survey has been done. 4. Conclusion os up to the mark.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Yes	
<u>Minor</u> REVISION comments Is language/English quality of the article suitable for scholarly communications?	Yes	
<u>Optional/General</u> comments
