In today's fast world the need for machine labour is extreme however most of Indian farmers being small and marginal ones often can't afford them which leads to more use of human labour. Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The concept of the manuscript is interesting however I find the sampling size is very small and based on only 15 samples that too from only 2 districts makes the conclusion drawn from the findings of the study not so valid. If the study was based on more data, the result could have had the authenticity in order to generalise the result for all paddy farmers which is not possible now.
