Manuscript Number:	Ms_IRJO_121450
Title of the Manuscript:	Tucatinib: A Breakthrough in Advanced Breast Cancer Therapy
Type of the Article	Minireview Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	These treatments often prolong relapse-free survival when used as adjuvants, although accessibility to these drugs can be limited by cost and availability. ^[8] From the patient's perspective, while traditional treatments have been effective, newer drugs, specifically designed to penetrate the CNS and target HER2-positive tumors, offer a promising alternative with potentially better outcomes and quality of life.	
Is the title of the article suitable? (If not please suggest an alternative title)	yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	yes	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	These treatments often prolong relapse-free survival when used as adjuvants, although accessibility to these drugs can be limited by cost and availability. ^[8] From the patient's perspective, while traditional treatments have been effective, newer drugs, specifically designed to penetrate the CNS and target HER2-positive tumors, offer a promising alternative with potentially better outcomes and quality of life.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	no	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments		
	Trials regarding breast cancer are important, since it is a disease that is increasing associated with multiple factors, where the rate of survival is still low, aggressiveness and recurrence are always latent, surgical preventive treatments or surgical solutions leave an indelible mark on the patient and their environment
