

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_121342
Title of the Manuscript:	Effect of Different Phosphorus levels and Mulch types on Growth and Yield of Mung bean
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Since, fertilizer demand is peaking. The usage of right quantity of fertilizer at right quantity is need of the hour (basic dose). That too particularly for leguminous crop. Good choice of selecting treatment	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Sufficient	
Are subsections and structure of the manuscript appropriate?	Review can be added at each segment or as separate title (introduction, review of literature, methodology, results and discussion , summary and conclusion) (Not compulsion)	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	<ol style="list-style-type: none"> 1. Separate title can be added in introduction (fertilizer about importance of N,P and K or basal doses , Moisture conservation like mulching, organic mulching, plastic mulching or uses of different colour mulches 2. Why black colour mulches is chosen/ why organic mulch Bajra Bhusa is used at 5 t /ha ? reference needed? 3. In results , since RBD design is adopted separate main plot and sub plots were included but in results separate results were provided stating $P_0, P_1 M_0, M_1 \dots$ etc .Actually the results are expected to be conveyed in their combination like $P_0 M_1 , P_0 M_2 , P_0 M_3 , P_0 M_4$.since u have mentioned it as combinations of treatment and u r graph , table, statistical analysis has to be changed accordingly 4. Kindly elaborate the conclusion or write it as summary and conclusion 	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Few recent article can be added if availabler	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes sufficient in some places clarity of expression is needed	
Optional/General comments	Over all it is good work , compile it with minor revision
