

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_121339
Title of the Manuscript:	In vitro evaluation of efficacy of Trichoderma harzianum on the radial growth of Alternaria alternata
Type of the Article	Original research

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This research is very useful because it utilizes biological fungicides that are safer. Harmful chemical fungicides are very labor-intensive for health. In addition, this research can be useful for farmers so that the Stevia rebaudiana plants produced are of high quality.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of article was suitable and represents the content of the manuscript	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	the methods section in the abstract needs to add details of the 6 treatment groups used. it is necessary to add a final sentence to the abstract that contains the final conclusion of the research results	
Are subsections and structure of the manuscript appropriate?	subsections and structure of the manuscript is good and appropriate	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Please explain in more detail regarding figure 1. Explain the difference between radial growth and Mycelial Inhibition results. Explain why Mycelial Inhibition results increased, but radial growth results decreased. Explain the basis for incubation for up to 7 days	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	reference for the last 10 years has reached 73%	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes, the language/English quality of the article suitable for scholarly communications	
Optional/General comments	In table 1, it is necessary to add a description of the letters a,b,c and so on in the radial growth column. In addition, it is necessary to add information in Figure 1 regarding the replication of each treatment. in Figure 1 it is necessary to add a standard deviation to each bar graph. in table 1 need to explain the symbol in the treatment notation column	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
