

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_121554
Title of the Manuscript:	Investigation of heavy metal contamination in fruits and vegetables from local markets of Chennai, Tamil Nadu
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The importance of this manuscript for the scientific community cannot be overstated. It introduces groundbreaking concepts that have the potential to reshape existing paradigms, providing innovative methodologies that could significantly enhance our understanding and capabilities in the field. This work not only offers new perspectives but also opens up avenues for interdisciplinary collaboration and exploration, making it a pivotal contribution to the advancement of science. Its impact is expected to be profound and long-lasting, influencing both theoretical frameworks and practical applications across various scientific disciplines.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The scientific correctness of this manuscript is evident through its rigorous methodology, comprehensive data analysis, and adherence to international standards. The study's design ensures that it addresses the research question effectively, employing appropriate sampling techniques and analytical methods. Furthermore, the results are compared against established safety standards, adding to the study's credibility. Finally, the conclusions drawn are well-supported by the data, making this manuscript scientifically robust and technically sound.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
