

**Review Form 3**

Journal Name:	<b>Journal of Advances in Mathematics and Computer Science</b>
Manuscript Number:	<b>Ms_JAMCS_121253</b>
Title of the Manuscript:	<b>On Some Properties of Square normal operators</b>
Type of the Article	<b>Original Research Article</b>

### Review Form 3

#### **PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	The manuscript is extremely important for Mathematicians and more particularly for those in the fields of Algebra, Analysis and operator Theory. The properties of Square normal operators have been discussed.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	The title of the article is s suitable to the subject matter in question.	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	<b>The</b> abstract is appropriate and very comprehensive capturing the key words as outlined in the main article.	
<b>Are subsections and structure of the manuscript appropriate?</b>	The structure of the manuscript and its subsections are very appropriate	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	Author(s) has(have) presented the manuscript in the required mathematical format using Latex, which is very commendable. Main results have been appropriately sequences using the lemmas, propositions and finally the main theorem which is the epitome of Operator Theory.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	Recent and sufficient references e.g. [13], [12], [10] and [12] have been cited. This is a clear indication that author(s) did a thorough research work by blending these articles with other older standard references like [2], [4] and [5] of Operator Theory.	
<b>Minor</b> REVISION comments		
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	English language command used by author(s) is suitable for scholarly work and publication.	
<b>Optional/General</b> comments	<ul style="list-style-type: none"> <li>Consider deleting the statement before example 3.3 since it is implied by the note after Theorem 3.3.</li> <li>Try also to give more examples of 3 by 3 or higher order square normal operators to enrich your results.</li> <li>Good article for publication subject to suggested revisions by other peer reviewers' comments</li> </ul>	

**Review Form 3**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

**Reviewer Details:**

Name:	<b>Isaiah Nalianya Sitati</b>
Department, University & Country	<b>Garissa University, Kenya</b>
