Type of Article :	cross-sectional descriptive study

### PART 2:

<b>FINAL EVALUATOR'S comments on revised paper (if any)</b>	<b>Authors' response to final evaluator's comments</b>
Overall Quality of the manuscript has <b>greatly improved with better writing style</b> , inclusion of a Discussion, Disclosure of Number of sample and biostatistics. +Advised a few minor changes a) Change "Purposively selected" to Convenience sampling or selective sampling based on treatment plan required or minimum PPD of 5 mm- as per author's choice. b) type of study is not "Cross sectional Descriptive" change it to "Cross sectional Interventional"- because non-surgical periodontal therapy and a drug regime was administered, which counts as intervention c)author's choice to reveal the exact value of Spearman's correlation coefficient not just its p value being significant. (makes more Impact on Discussion) d)check the name of the stats its cant be "paired T test" as it is reserved for only split mouth studies it should be just "t test" as there are 2 different groups of people.
