

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_121238
Title of the Manuscript:	Influence of chemical, organic and biofertilizers on growth, yield attributes and yield of Indian mustard (Brassica juncea L.)
Type of the Article	

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	yes	
Is the title of the article suitable? (If not please suggest an alternative title)	yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	yes	
Are subsections and structure of the manuscript appropriate?	yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This is due to the use of a method of combining organic and biological fertilizers with chemical fertilizers, which results in improving plant growth and reducing the toxicity of chemical compounds, in addition to the good method of presenting the research by the researcher.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	yes	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	yes	
<u>Optional/General</u> comments	<p>1-Please mention abbreviations FYM,RDN</p> <p>2- The method of work is very brief and was not mentioned in paragraphs. It lacks a mention of the type of soil and its characteristics used in the experiment, as well as the age of the plant at the time of its harvest, in addition to not mentioning the method of work to estimate chlorophyll content with reference to the source. The researcher must mention the statistical analysis paragraph if he did not refer to it within the method of work.</p> <p>The discussion needs accurate scientific explanations because most explanations are repeated</p>
