

Editor's Comment:

The authors have attempted to respond to the reviewers' comments. However, they should not of the following.

1. Authors should refer to the manuscript with track changes for reviewer RAH (Rev_JEAI_121914_Rah_A). He has suggested important changes with some touching on grammar and typos and have not been responded to. For example:
 - He has suggested change of title to suit the manuscript.
 - He has indicated that the journal names in the reference list should be italicized.
 - Removing the word mean in table three caption
 - And several typos within the text
2. Remove the quotation marks in the abstract.
3. The authors should also do a final read to polish any grammatical errors before the paper can be published.

Decision:

The manuscript should be published in the journal after the suggested revisions have been applied.
