

Review Form 3

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_122395
Title of the Manuscript:	Navigating the Threat: Invasive Insect Pests and Their Impact on Indian Agriculture
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Invasive species pose a significant threat by outcompeting native species in their natural habitats and having a substantial impact on the nation's economy. Despite strict quarantine regulations, numerous insect pests have managed to enter India, causing serious problems. The current study provides a comprehensive overview of invasive pests, their invasion pathways and potential strategies for mitigating their spread. However, the article needs improvement especially in the sub sections.	
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract needs to be rewritten as it is not aligned properly with the content of the study. The pest like Woolly apple aphid, San Jose scale, and Cottony cushion scale are invaded long back into our country. The conclusion is largely irrelevant to the research, as it appears to have been copied from another source. The author should thoroughly review and revise the manuscript before submitting it to the journal to prevent errors.	
Are subsections and structure of the manuscript appropriate?	The section topic is adequate but requires revision as highlighted in the attached manuscript. The scientific names of insects should be accompanied by the author's name. There are numerous errors in the manuscript that need to be corrected.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The author attempts to provide an overview of invasive pests, case studies and mitigation strategies. However, the information presented is already well-known and lacks any new insights or originality and needs updated information.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The manuscript requires the inclusion of more recent references, as there are many relevant and high-quality publications available on this topic. Besides, the references are not formatted according to the journal's guidelines.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Needs major revision to satisfy the journal quality.	
Optional/General comments	The manuscript needs to be rewritten and formatted according to the journal's guidelines. The highlighted points in the attachment should be carefully reviewed to ensure an error-free publication.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
