<p>Are subsections and structure of the manuscript appropriate?</p>		
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<ol style="list-style-type: none"> 1) There are a few spelling mistakes. Hypokalaemia is spelled differently throughout the text. It is advised to have the report run through a spell checker to correct these mistakes. 2) Cordarone is a brand name. Use Amiodarone instead as most readers outside of the authors country won't be aware of the particular brand names. 3) The discussion attempts to cover a wide range of information related to primary hyperaldosteronism, but it lacks clear focus. The transitions between discussing hypertensive prevalence, cardiac complications, and treatment outcomes are abrupt and could benefit from more structured organization. Consider breaking down the paragraph into smaller sections or sentences that focus on individual aspects, such as epidemiology, pathophysiology, clinical features, and treatment. 	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>		
<p><u>Minor</u> REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p><u>Optional/General</u> comments</p>
