

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_122092
Title of the Manuscript:	Influence of Soil Application through Integrated Nutrient Management on Soil Characteristics of Sweet Orange Orchard in Gird Region of Madhya Pradesh, Bharat
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Yes, the manuscript is important for scientific community. It consisted of a fertilization trial to determine the effect of combining certain fertilizer rates on the physical and chemical properties of soils. The analysis of these properties has made it possible to identify the fertilizer combination that promotes better nutrient availability in the soil for crops. This would represent a good basis for cultivation practices for farmers.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title of the article is suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, the abstract of the article is comprehensive, but should be improved by replacing the title with the objective of the study, as we have indicated on the manuscript	
Are subsections and structure of the manuscript appropriate?	Yes, the subsections of the manuscript are appropriate	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The introduction briefly presented the conditions for the production of the sweet orange as well as the importance of soil fertility management in agricultural production. However, it must be better developed with the contribution of examples of studies on the theme, less than 10 years old. The influence of soil properties on the availability of nutrients in the soil and their uptake by plants needs to be explained. The study area must be better presented with geographical coordinates and the climatic conditions of the area	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are insufficient and many are more than 10 years old. Similarly, some references are not found in the manuscript	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes, the language quality of the article is suitable for scholarly communications	
<u>Optional/General</u> comments
