

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_122092
Title of the Manuscript:	Influence of Soil Application through Integrated Nutrient Management on Soil Characteristics of Sweet Orange Orchard in Gird Region of Madhya Pradesh, Bharat
Type of the Article	

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The manuscript is good because it addresses the problem of soils that suffer from a lack of phosphorus availability.	
Is the title of the article suitable? (If not please suggest an alternative title)	title of the article suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	abstract of the article comprehensive In the abstract, the 100% lime treatment recorded a higher rate than 50%, in addition to 100% + PROM, which recorded a higher rate than 50% + PROM. Please rewrite according to the paragraph according to the superior treatments in the experiment.	
Are subsections and structure of the manuscript appropriate?	Appropriate The collection of studied characteristics should be discussed, with reference to the table number during the discussion. Then the tables should be listed, as Table No. 1 and Table 2 include all characteristics.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is considered scientifically correct, including all the elements of scientific research. In addition, this manuscript is considered average from a scientific perspective, because the subject of the manuscript was addressed in previous research, and it was necessary to study the effect of treatments on the availability of phosphorus in the soil, and this is the main goal.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	the references sufficient and recent	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	the language quality of the article suitable for scholarly communications	
<u>Optional/General</u> comments	1- In the paragraph on the effect of treatments on height, the last paragraph should be deleted. The highest plant height was observed with treatment combination lime@100% + PROM (L3P3). It was 15.68% higher than the plant height observed with the lime@100% (L3) without phosphorus and 9.6% higher plant height was observed with the PROM (P3). The ratios are not healthy. In addition, the paragraph has been written and there is no need to repeat it. 2- The graphs are not clear.
