EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. The main problem in the research is the low level of the labor participation of the woman in the tourism industry. 12 women were interviewed for this purpose and the results had been interpreted. The results presented. Conclusion and recommendation section is very long and I suggest authors shorten it. Language of the paper is very problematic and should be improved seriously. The design of the paper and its content is weekly written. Authors could not improve the paper according to the suggestions of the reviewers.</p>	<p>Please be aware that I had access to only 12 women. We sent over 300 online questionnaires to hotel staff and only 12 women responded. Conclusion was revised. The English were revised please active review check in the word.</p>
