A minimum of 3-4 sentences may be required for this part.	Malaria is the actual problem from all population of the Earth. Many reasons we know. One of this is the bacterial resistance. Scientences are finding the new ways to the treatment of malaria. The authors have done a good job of expanding knowledge in this field	
Is the title of the article suitable? (If not please suggest an alternative title)	In my opinion, the title of the manuscript is absolutely appropriate for the submitted text and I have no alternative	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, the abstract is absolutely comprehensive. I want say about abstract: -should correction of all bacteria and fungi names (according to their classification) -should correct shtamms bacteria and fungi in all article parts. Ones are not same, but must be.	
Are subsections and structure of the manuscript appropriate?	The structure is right for the article in my mind	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This article is interesting and actual by the purposes. As the scientific side, article is absolutely correct and understanding. We can see big work of authors command.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are old for my mind. The youngest reference is 2020. Only 1 from 34.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The English quality of the article is suitable for scholarly communications	
Optional/General comments	<ol style="list-style-type: none"> 1. Names of bacteria and fungi (italics) 2. They must have name of sources (pure culture or hospital). If pure – their number for identification. 3. In every parts we can see different bacteria and fungi in the investigation 4. I have the question about Fe (III) and its salt as a Fe (II). Are authors changes Fe valency. I didn't find any inform about this. 5. Article absolutely without statistic, sub sample, their numbers 6. Fig.3 has particaly sub names. Every spectra should have own same name 7. Old references
