

Review Form 3

Journal Name:	International Neuropsychiatric Disease Journal
Manuscript Number:	Ms_INDJ_122506
Title of the Manuscript:	Public Health Policies and Programs for Alzheimer's and Dementia: A Data-Driven Evaluation of Effectiveness and Areas for Improvement in the United States
Type of the Article	A Research Article

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	It is very crucial and vital topic. Recently, Alzheimer's disease and other dementias are becoming more common due to an aging population. The number of people affected is expected to grow significantly, putting an additional strain on individuals, families, and the healthcare system. Therefore, effective research, studies, and programs are critical to managing this growing public health challenge. It helps create a more effective and responsive public health approach to one of the most pressing challenges facing the aging population, and also the current research support the caregivers leading to more effective interventions and potentially new therapies.	
Is the title of the article suitable? (If not please suggest an alternative title)	Acceptable and informative enough	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive, but it should have one clear major aim only. Information about the sample must be mentioned before mentioning the data collection methods. The initial letters of the keywords should be capitalized.	
Are subsections and structure of the manuscript appropriate?	Yes they are.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	In sum, the research design and the selected approaches respect the template and guidelines of the journal. Yet problems of indentation through all parts of the work are detected, missing some of the methodological instructions. Further, one remarkable note, is the successive use of too long paragraphs. For instance, you cannot have a paragraph of more than ten sentences. In your work, you have used many very long ones.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Is a good and well documented work. Very rich bibliography recent, varied, and updated.	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Only few mistakes, or let's say errors in grammar. For example, using "was" instead of "were" when speaking about Alzheimer and dementia.	
<u>Optional/General</u> comments	Overall, this topic is critical for driving new research and innovation in Alzheimer care and treatment, leading to more effective interventions and potentially new therapies. Additionally, evaluating these efforts helps determine if is crucial for early diagnosis and support. By the end, minor revision and organization of the work they are successfully raising awareness, reducing stigma, and educating the about dementia public, which is required.
