PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This paper is an experimental study comparing the flexural capacity and deformation of reinforced concrete beams using recycled rebar. The study lacks an introduction and comparison of the manufacturing process and physical properties of the recycled rebar from the most important supplier, making it impossible to compare it with conventional rebar. It is deemed necessary to demonstrate its practicality in actual reinforced concrete beams. Addressing this point would enhance the completeness of the paper; therefore, the review is currently on hold.	
Is the title of the article suitable? (If not please suggest an alternative title)	OK	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.
