| Title of the Manuscript: | The Genetics of Primary Open Angle Glaucoma Interventions: Therapeutic Directions, and Future Predictions. |
| Type of the Article | Review Article |

Review Form 3

PART 1: Review Comments

| Compulsory REVISION comments | Reviewer's comment | Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|---|---|
| Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part. | Open Angle Glaucoma is very important Ophthalmic disease which if untreated leads to blindness. It is major preventable cause of blindness which occurs very silently manner. New treatment options always required to prevent blindness in these patients. Genetic basis is also helpful to determine the treatment perspective in these patients. So I like this review article. | |
| Is the title of the article suitable? (If not please suggest an alternative title) | Yes | |
| Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here. | Abstract of article is comprehensive but if it is write in structured format e.g- like Introduction, Methodology, Goals, conclusions its looks much better. | |
| Are subsections and structure of the manuscript appropriate? | Yes appropriate but some sections are missing like Consent required or not , Ethical approval needed or not, Competing Interest not mentioned. | |
| Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part. | As the article explore the all aspect of genetic basis of disease, possible targets for treatment and gene therapy and also new approach towards the glaucoma therapy. So as reader he will gets all the information related to genetic basis of disease therapy existing treatment and further more advancement of treatment. | |
| Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. | Yes references are sufficient and recent but not as per the format given in authors guideline for referencing. E.g. 1. Et al should be placed after writing 6 author name but this criteria not follow all over e.g. reference no. 30 and 41..... 2. reference no 43 and 44 is from website but not write in proper manner like available at, time when you excess the website. Please correct it. Please review once on referencing style available in author's guideline of the journal. | |
| Minor REVISION comments | | |
| Is the language/English quality of the article suitable for scholarly communications? | Yes English language comprehensible and easily understood. | |
| Optional/General comments | | |
