PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	This draft publication has no references in text. As it is a review with no research component this is one of the most important aspects of the article. There also are no citations giving credit to the experts in this field. It reads as if these ideas and concepts are your own. I would ask the writer to start with this requirement. However, I also would suggest they modify the structure in a way that makes the article academically robust. At present, it merely regurgitates the work of others without proper credit. In addition, there is no explanation related to the tables nor mention of where they are supposed be in the text. I suggest that all of these items are amended and then the article is resubmitted for review.	
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?		
<u>Optional/General</u> comments
