Manuscript Number:	Ms_ARJGO_123542
Title of the Manuscript:	An Observational Study On The Effect Of Maternal Booking Body Mass Index On Pregnancy Outcomes At The Benue State University Teaching Hospital, Makurdi
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Maternal malnutrition influences the pregnancy outcomes and increased the risk of morbidity and mortality among mothers and new-borns. This is an important area of research to save lives and to prevent morbidity consequences. This study described both maternal and neonatal consequences.	
Is the title of the article suitable? (If not please suggest an alternative title)	I added the country name and I am ok with the title.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No. I added some words and sentences and made comments to make the article comprehensive. I also deleted some words. However, authors or editors can accept or reject my addition or deletion.	
Are subsections and structure of the manuscript appropriate?	Partly. I made some important questions that need to be answered for its appropriateness.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The author mentioned p-value, but did not mention in the table; How BMI was measured was not discussed, BMI categorization was not properly described; urban and rural difference, ANC, and PNC issues were not properly explained; some important references were missed; LBW or maternal chronic diseases associated with BMI was not discussed; purpose of physical and pathological tests was not explained. The answer to my questions would improve its technical correctness and scientifically robust.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Some correction required. I made comments and made some examples.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	English quality need improvement.	
Optional/General comments		
	Though this article need significant correction and modification, this is an important issue to understand the impact of BMI on pregnancy outcomes.
