

Review Form 3

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_123093
Title of the Manuscript:	Vulvar Paget's Disease with inguinal lymph node metastasis: a case report
Type of the Article	Case Report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The case follows a typical course of EMPD and is not rare. There is insufficient information provided to determine treatment choices.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The phrase "a high rate of dissemination" is misleading.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript has been through a general course and has been duly checked for the scientific correctness. Some require more detailed information.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Appropriate	

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>PRESENTATION OF CASE</p> <p>First paragraph; Please describe the size of the lesion. Why did you diagnose SCC instead of EMPD? What were the results of IHC? The standard of treatment is surgical resection. Please provide a rationale for determining that the disease is unresectable. Please indicate whether or not there is metastasis based on imaging findings. Please indicate the type and amount of radiation. Please describe the treatment results.</p> <p>Third paragraph At the initial visit, were there any findings in the vaginal canal on the MRI?</p> <p>Fourth paragraph What do you think about the PET-CT findings? If all lesions are metastases, a lymphadenectomy of the right pelvic chain is an inappropriate procedure.</p> <p>Fifth paragraph What did you think of CK20 and GCDFP15? What is the effect of chemotherapy on lymph node metastasis?</p> <p>Conclusion Not well documented to provide extensive insight to pathologists</p>	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
