

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_123216
Title of the Manuscript:	In Vitro Evaluation on Efficacy of Bioagents and Plant Extracts Against Early Blight of Tomato (<i>Alternaria alternata</i>)
Type of the Article	original manu. article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The subject under study is important and <i>Alternaria</i> fungus causes widespread economic losses. The use of environmentally and human friendly antifungals is an excellent study and has shown useful results.	
Is the title of the article suitable? (If not please suggest an alternative title)	It is suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract need rewriting, it miss important points of methods and results.	
Are subsections and structure of the manuscript appropriate?	It need modifications	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The researcher/s followed the standard methods in testing the antifungal activity. Tomato is one of the most global vegetables and <i>Alternaria</i> sp. Is a well known effective pathogen on it. The plant extract and biocontrol on several phytopathogen is important studding field.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Expanding the Shelf Life of Tomato Fruits (<i>Solanum Lycopersicum</i> Mill) Using N-Hexan Extract of	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	It is suitable	
Optional/General comments	Re arrange the paragraphs within the Chapters (delete some and add others) There are positive points The researcher/s followed standard methods for plant extraction They used perfect technique for isolation The antifungal test was standardized and results were statically compered
