

### Review Form 3

Journal Name:	<b>Journal of Advances in Biology &amp; Biotechnology</b>
Manuscript Number:	<b>Ms_JABB_123425</b>
Title of the Manuscript:	<b>Screening of tomato germplasm lines against major diseases under naturally ventilated polyhouse</b>
Type of the Article	

#### **General guidelines for the Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

#### **Important Policies Regarding Peer Review**

Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

**Review Form 3**

**PART 1: Review Comments**

<b><u>Compulsory</u></b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p><b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>The current study "Screening of tomato germplasm lines against major diseases under naturally ventilated polyhouses" is an important study as these two diseases are responsible for causing huge losses in tomato. These two diseases are not manageable even with the pesticides. Therefore, the only way here is to identify the potential resistant sources. The identified resistant sources can be used to increase tomato production after proper validation.</p>	
<p><b>Is the title of the article suitable? (If not please suggest an alternative title)</b></p>	<p>No, I could not find this title suitable. The authors have screened germplasm against only two diseases and not many diseases. Therefore, the name of two diseases can be mentioned in the title. The suggested title is mentioned in the main text with a comment.</p>	
<p><b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>	<p>Author must mention 1-3 lines regarding the screening methods in the methodology section. In results part of the abstract, disease incidence of the genotypes must be mentioned in the parenthesis.</p>	
<p><b>Are subsections and structure of the manuscript appropriate?</b></p>	<p>No. Authors have not discussed the methodology in a proper way. The discussion part is also lacking.</p>	
<p><b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b></p>	<p>The manuscript is scientifically robust but authors need to improve the technical aspect as per the suggestions.</p>	
<p><b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b> -</p>	<p>Yes. But they are not as per the journal guidelines.</p>	
<p><b><u>Minor</u></b> REVISION comments  <b>Is the language/English quality of the article suitable for scholarly communications?</b></p>	<p>No. there are many spelling and grammatical mistakes some of which are highlighted with track changes in the main file.</p>	
<p><b><u>Optional/General</u></b> comments</p>		

### Review Form 3

#### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
