

Review Form 3

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_123460
Title of the Manuscript:	Influence of foliar spray and stages of zinc application on seed quality parameters of harvested radish seeds
Type of the Article	

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Zn is one of the very important micronutrients having role in almost all six class of enzymes, it lack in soil such as calcareous oil making it important to have more research on this topic. And it is an important topic, should write with more clarity on highlighting problem in introduction regarding its deficiency in soil and with proper objective.	
Is the title of the article suitable? (If not please suggest an alternative title)	<u>Improvement and clarity is needed</u> " Influence of foliar spray with different doses of Zn (mention form of zinc) at various crop stages -on quality parameters of harvested radish seeds	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is not clear specially with regards to methodology part. Write which Zn form have been used and methodology clearly	
Are subsections and structure of the manuscript appropriate?	Result and discussion lack clarity, Improvement should be done on result writing part and discussion should be more improved with recent papers and on the stages of crop too	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Manuscript is scientifically correct as there is a huge role of Zn in seed formation as it has different role in biosynthetic pathways of crop, Manuscript requires major correction in all subheading majorly in result and discussion and table preparation	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	No recent references are used, Refer recent manuscript from 2021 to 2024	
Minor REVISION comments	English is fine can be improved little more	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	Require to post hoc analysis such as DMRT if possible do include soil data too. With moderate revision the paper can be useful for scientific community and can be published if worked on above comments and feedback	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
