

Review Form 3

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_123200
Title of the Manuscript:	Effect of integrated weed management practices on weed indices in rice (<i>Oryza sativa</i>) under SRI
Type of the Article	Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is of significant importance to the scientific community as it addresses the critical challenge of weed management in rice cultivation, specifically under the System of Rice Intensification (SRI). Integrated weed management practices are essential for sustainable agriculture, and this study provides valuable insights into optimizing weed control in rice, thereby enhancing crop yield and reducing reliance on chemical herbicides. The findings have the potential to influence best practices in rice farming, contributing to both environmental sustainability and food security.	Need to reduce plagiarism because plagiarism showed about 35%.
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It should succinctly convey the purpose of the study, specifically focusing on the evaluation of integrated weed management practices on weed indices in rice under SRI.	
Are subsections and structure of the manuscript appropriate?	Each subsection should be directly relevant to the research question and contribute to a comprehensive understanding of the topic.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript appears to be scientifically robust and technically sound due to its well-structured approach to addressing the impact of integrated weed management (IWM) practices on weed indices in rice under the System of Rice Intensification (SRI). The study is grounded in a solid experimental design that includes appropriate control and treatment groups, ensuring that the results are reliable and can be attributed to the specific IWM practices tested. The use of relevant and precise methods to measure weed indices, along with rigorous statistical analysis, strengthens the validity of the findings. Additionally, the manuscript demonstrates a comprehensive understanding of the existing literature, allowing the authors to position their research within the broader context of sustainable agriculture.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	Yes	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Need to minor revision	
Optional/General comments	The figures and tables used in the manuscript are helpful, but their impact could be increased by ensuring that all visual aids are clearly labeled and easy to interpret. Consider adding more descriptive legends where necessary to guide readers through the data.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
