PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is relevant because it examines the factors that influence the use of routine immunization services. Understanding the factors that influence the use of routine immunization services is important to enable the design of interventions to improve vaccination coverage, especially in children with zero doses.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The study design refers to an analysis of the factors that influence the use of routine immunization services, but the Abstract does not present the factors mentioned, it describes only the trend of the use of routine immunization services. Include data analysis treatment in the study design.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The presentation of the results lacks an analysis of the factors that influence the use of routine immunization services. There is no robust comparative analysis of the differences between the different antigens.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Very limited bibliographical references.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	There is a need to improve the presentation of the results, to include an analysis of the factors that influence the use of routine vaccination services, to compare the vaccination coverage of the different antigens and their associated factors. Reinforce the reference literature, which is very limited. Indicar a entidade que fez aprovação ética e número de registo de aprovação.	
Optional/General comments
