

Review Form 3

Journal Name:	Journal of Geography, Environment and Earth Science International
Manuscript Number:	Ms_JGEESI_123324
Title of the Manuscript:	Vector Borne Disease Ecology and Environment: Remote Sensing and GIS for Control and Management-A Systematic Review
Type of the Article	Review Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The integration of Remote Sensing (RS) and Geographic Information Systems (GIS) is indeed critical for effective vector-borne disease (VBD) control and management. These technologies enhance our ability to quickly eradicate and monitor VBDs on a global scale, providing valuable insights for public health initiatives.	
Is the title of the article suitable? (If not please suggest an alternative title)	Title may not be suitable to the content. Because "Remote Sensing and GIS for Control and Management" - review must be detail about the RS Data and GIS techniques used to control and management the VBD which is absent. <i>Title may be like "Vector Borne Disease Ecology and Environment: A Systematic Review"</i>	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract has not fulfilled the Title. The study deals with the Vector Borne Disease Ecology and Environment alone not with RS and GIS Techniques. Title may be changed as above.	
Are subsections and structure of the manuscript appropriate?	Not up to the level	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	As per the title, it must deal with, What are the types of RS Data and processing techniques are used for objectives? How is GIS used for mapping and delineating the areas according to the control strategy? How were researchers used RS and GIS for controlling and monitoring of VBD? With examples.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	For review, the reference is not up to the level. Also, author has used 13 references of single person references.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Required Minimum of grammar correction.	
Optional/General comments	Title may be changed. Or rewrite based on the title.	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
