PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>This manuscript addresses the critical issue of youth and graduate unemployment in the Owo Local Government Area of Ondo State, Nigeria, by exploring the impact of entrepreneurship skill acquisition. The study is particularly important as it provides empirical evidence on the role of entrepreneurship education in alleviating unemployment in rural communities, which is a pressing concern for developing economies. The manuscript's findings could inform policy decisions and educational reforms aimed at fostering self-reliance and job creation among youths. Additionally, the discussion of the results could be expanded to include a comparison with previous studies in the field, which would help contextualize the findings and highlight the study's contribution to existing knowledge. Addressing these aspects would enhance the manuscript's overall rigor and relevance to the scientific community.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>The title of the article could be more specific to reflect the study's focus on the role of entrepreneurship skill acquisition in addressing youth and graduate unemployment in Owo Local Government Area of Ondo State. While the current title might give a general idea, it doesn't clearly convey the geographic scope or the specific focus on unemployment and entrepreneurship skills.</p> <p>Suggested Alternative Title: "Impact of Entrepreneurship Skill Acquisition on Youth and Graduate Unemployment in Owo Local Government Area, Ondo State" This alternative title more accurately reflects the content of the study and provides potential readers with a clearer understanding of the article's focus.</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>The abstract provides a general overview of the study but could be improved. It should include the study's objectives, a brief methodology, specific key findings, and a concise conclusion. This would make the abstract more comprehensive and informative.</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>The subsections and structure of the manuscript are generally appropriate, as they follow a logical flow from the introduction to the conclusion.</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>The manuscript appears to be scientifically robust and technically sound due to its systematic approach to data collection and analysis, particularly through the use of chi-square tests to evaluate hypotheses. The results are clearly presented with appropriate statistical backing, which lends credibility to the findings. Furthermore, the study addresses relevant socio-economic issues, such as unemployment and entrepreneurship, providing valuable insights into their impact on youth in Owo local government area. The integration of empirical data with theoretical discussions strengthens the manuscript's overall scientific rigor.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :</p>	<p>The references provided in the manuscript cover a range of studies related to entrepreneurship and vocational training, offering a solid foundation for the research. However, while the references are relevant, some may be slightly outdated, with the most recent sources from 2023 and some as far back as 2015. To enhance the manuscript's relevance and reflect the most current research trends, I suggest including more recent studies or reports from the past 2-3 years, especially those focusing on recent developments in entrepreneurship education and vocational training. Additionally, including more references from recent international studies could provide a broader perspective on the issues discussed.</p>	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	The manuscript's language is generally suitable for scholarly communication but needs improvement. Enhancements in clarity, grammar, punctuation, consistency, and the explanation of technical terms are recommended to ensure the content is clear and professionally presented.	
Optional/General comments	The manuscript provides a solid foundation with a clear context and effective data presentation through tables and figures. However, it would benefit from a more comprehensive literature review to better establish the study's significance and novelty. The methodology section, while detailed, should explain the rationale behind the methods more thoroughly and include specifics on sampling and data collection. The discussion could be expanded to link findings more deeply to the literature and discuss implications in greater detail. Enhancing the conclusion with more specific recommendations and suggestions for future research would add practical value. Minor typographical and formatting errors need to be addressed through proofreading, and ethical considerations should be clearly stated. Overall, these improvements will enhance the manuscript's quality and contribution to the field.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
