Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This research contributes significantly to understanding the stability of nonlinear systems under random influences and delayed feedback , showing that even in the presence of such complexities, systems can be designed to self-stabilize in an almost sure exponential sense . The use of Ito-type Brownian motion allows the modeling of random influences, and the optimal control framework provides practical tools for controlling such systems efficiently.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your	Please rewrite	
Is the manuscript scientifically, correct? Please write here.	Yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Some new references can be added if possible	
Is the language/English quality of the article suitable for scholarly communications?	OK
