TitleoftheManuscript:	AReviewonNaturalFarminginHorticulturalCropProduction
TypeoftheArticle	Review

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that an author should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This is relevant especially at this time where our agroecosystems have been ecologically destroyed and severely degraded.	
Is the title of the article suitable? (If not, please suggest an alternative title)	A little enhancement and specificity would be great.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	In the abstract, it would be good to mention some issues after stating that India's horticulture industry is dealing with a variety of issues. This will give readers a bird's-eye view of the scenario.	
Are subsections and structure of the manuscript appropriate?	Towards the end of the Introduction, I suggest authors should state the objectives of the paper, which then become the basis of the subtopics of the discussion. Hence, I suggest a re-examination of the subtopics or subsection of the paper.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	It outlines the importance of ecological agriculture, which is natural farming. This is relevant and will indeed address pressing environmental problems and issues of the times. There is a need for fine-tuning and enhancement: Lists of green manure plants, tree leaf extracts and plants with bioactivity, are better presented in tables rather than simply in bullets. I further suggest to have a subsection on comparative presentation of natural farming systems in various countries.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. -	Ok	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Language is ok	
Optional/General comments	NA
