

Review Form 3

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_128093
Title of the Manuscript:	Morphological Characterization of Horse gram genotypes (<i>Macrotyloma uniflorum</i> Lam)
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The study on the morphological characterization of horse gram genotypes provides valuable insights into the genetic diversity and adaptability of this underutilized legume. It contributes to its conservation and potential use in breeding programs for sustainable agriculture. The manuscript is well-structured, with a clear aim, methodology, and discussion of results. However, some areas require further elaboration and refinement to enhance the quality of the study.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Some improvements are needed in the abstract. Mention about results in the abstract. Make it concise and attractive. Also arrange keywords alphabetically and first letter in capital.	
Is the manuscript scientifically, correct? Please write here.	Yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Is the language/English quality of the article suitable for scholarly communications?	Language is correct but some grammatical corrections are required. Check spacing after full stop.	
Optional/General comments	This research holds promise in enhancing our understanding of diversity. Addressing the above suggestions will significantly improve its clarity, impact, and applicability. The study is a commendable effort toward promoting an underexploited legume with immense potential in sustainable agriculture systems. Citations should be checked properly.
