

### Review Form 3

|                          |  |
|--------------------------|--|
| Journal Name:            | <a href="#">Asian Journal of Economics, Business and Accounting</a>                        |
| Manuscript Number:       | Ms_AJEBA_127791  |
| Title of the Manuscript: | <b>Renewable Energy in India: An overview and the path towards Sustainable Development</b> |
| Type of the Article      |  |

#### **PART 1: Comments**

|   | Reviewer's comment   | Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|---|--|---|
| <b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b> | This manuscript provides a comprehensive analysis of India's renewable energy landscape and its path toward sustainable development. The research is particularly valuable as it examines the intersection of renewable energy adoption and sustainable development goals in one of the world's largest energy consumers. The paper's detailed analysis of current policies, infrastructure, and state-level implementation offers important insights for policymakers and researchers studying energy transitions in developing nations. Its thorough examination of various renewable energy sources and their role in achieving sustainability makes it a significant contribution to the literature. |   |
| <b>Is the title of the article suitable? (If not please suggest an alternative title)</b>   | The title " <i>Renewable Energy in India: An overview and the path towards Sustainable Development</i> " accurately reflects the content and scope of the research. It clearly communicates both the geographical focus and the dual emphasis on renewable energy and sustainable development.   |   |
| <b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>      | The abstract effectively summarizes the key elements of the research. However, I suggest adding: <ol style="list-style-type: none"> <li>1. Specific quantitative targets from India's renewable energy goals</li> <li>2. Key findings regarding state-level implementation successes</li> <li>3. Brief mention of policy recommendations or challenges identified</li> </ol>   |   |
| <b>Is the manuscript scientifically, correct? Please write here.</b>  | The manuscript demonstrates strong scientific rigor in its analysis and presentation of data. The methodology is appropriate for the research objectives, and the conclusions are well-supported by the data presented. The statistical information and policy analysis are accurate and well-documented.  |   |
| <b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>                              | The references are recent and relevant, covering key literature in the field.  |   |

**Review Form 3**

|   |  |  |
|---|--|--|
| <p><b>Is the language/English quality of the article suitable for scholarly communications?</b></p> | <p>The manuscript's language is suitable for scholarly communication. The writing is clear, precise, and maintains appropriate academic tone throughout. Technical terms are well-explained and properly used.</p>   |  |
| <p><b>Optional/General</b> comments</p>   | <p><b>The manuscript warrants a high score for several compelling reasons. First, it presents a thorough and well-structured analysis of India's renewable energy landscape, providing valuable insights for both academic researchers and policy practitioners. The research demonstrates exceptional rigor in its methodology and data analysis, with conclusions that are firmly supported by empirical evidence.</b></p> <p><b>The paper's greatest strength lies in its comprehensive examination of how renewable energy adoption intersects with sustainable development goals in India, one of the world's most significant energy markets. The analysis of current policies and infrastructure is particularly noteworthy, offering actionable insights for policymakers and researchers studying energy transitions in developing nations.</b></p> <p><b>The few areas requiring minor revision include:</b></p> <p><b>The abstract would benefit from incorporating specific quantitative targets regarding India's renewable energy goals, highlighting key findings from state-level implementation successes, and briefly addressing policy recommendations or implementation challenges. These additions would strengthen what is already a well-crafted research paper.</b></p> <p><b>The manuscript's clear writing style, appropriate use of technical terminology, and logical structure further enhance its scholarly value. The references are both current and relevant, providing a solid foundation for the research findings.</b></p> <p><b>This score reflects the paper's substantial contribution to the field, its methodological soundness, and its immediate relevance to current energy policy discussions, while acknowledging the minor revisions that would elevate it to an even higher standard of academic excellence.</b></p> |  |

**PART 2:**

|  |   |   |
|--|---|---|
|  | <p><b>Reviewer's comment</b></p>  | <p><b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p> |
| <p><b>Are there ethical issues in this manuscript?</b></p> | <p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p> |   |
