

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_127575
Title of the Manuscript:	Production potential of diversified intercropping system in paired row rice in summer fallows
Type of the Article	Original Research Article

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Important Policies Regarding Peer Review

Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Intercropping treatments, particularly rice + grain cowpea (T ₁), demonstrated comparable results in terms of productive tillers and overall yield, along with the highest economic returns. These findings suggest that paired row planting with suitable intercrops, such as grain cowpea, can balance productivity with profitability while improving resource use and reducing weed pressure. This approach holds promise for sustainable cropping systems, especially in water-limited conditions, offering farmers a viable strategy to enhance income and maintain soil health.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Is the manuscript scientifically, correct? Please write here.	Yes , <ul style="list-style-type: none"> -The manuscript is sufficiently robust and technically sound. - Materials & methods : the suitability and technical standards of the methods is very good. - Results & discussion : the data well controlled and robust. - The relevant and current references during discussion. - Discussion and conclusions based on actual facts . - Sufficient and appropriate statistical analyses have been carried out. - All the references cited relevant and adequate. 	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes
