

Review Form 3

Journal Name:	Journal of Economics, Management and Trade
Manuscript Number:	Ms_JEMT_128001
Title of the Manuscript:	Evaluating the Potential Impacts of Monetary Policy Autonomy in the CFA Franc Zone: A Comparative Analysis of Francophone African Countries and Other African Economies
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides critical insights into the impacts of monetary policy autonomy in the CFA Franc Zone, using advanced econometric models. It offers valuable guidance for policymakers and contributes significantly to the global discourse on economic independence and monetary reform.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title, " <i>Evaluating the Potential Impacts of Monetary Policy Autonomy in the CFA Franc Zone: A Comparative Analysis of Francophone African Countries and Other African Economies</i> ," is descriptive but lengthy. Suggested Alternative: " <i>Monetary Policy Autonomy in the CFA Franc Zone: Comparative Insights from Francophone and Non-Francophone African Economies</i> " This revision maintains clarity while being more concise and engaging.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive but could benefit from simplifying jargon, emphasizing unique contributions to monetary autonomy research, and clearly outlining policy implications. Streamlining redundant descriptions of regimes would improve readability and focus on the study's key findings.	
Is the manuscript scientifically, correct? Please write here.	The manuscript appears scientifically sound, employing robust econometric models such as DSGE and PSTR to analyze monetary policy autonomy in the CFA Franc Zone. The methods align with the research objectives, and findings are supported by appropriate data and theoretical frameworks.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are adequate and include recent studies, but adding reports from organizations like the IMF or African Development Bank and more regional comparative studies could provide greater depth and context for the analysis of monetary policy autonomy.	
Is the language/English quality of the article suitable for scholarly communications?	The language is clear and generally suitable for scholarly communication, but minor revisions to simplify technical jargon and enhance readability would improve accessibility for a broader academic and policy-oriented audience.	
Optional/General comments	The manuscript addresses a relevant topic with robust methodologies and meaningful insights. Simplifying jargon, enhancing policy implications, and streamlining the abstract would improve readability. Additional regional references could strengthen the comparative analysis and contextual relevance further.
