#### PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community . A minimum of 3-4 sentences may be required for this part.</b>	The manuscript addresses the significant relationship between Dietary Patterns and Mental Health which has gained attention in the recent years. However, the manuscript is mere compilation of available information without any absolute new addition to the literature. The manuscript has major issues as the references are very poorly cited in text. Entire manuscript looks like work of AI tools.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	The title may be modified to "Exploring the Relationship Between Dietary Patterns and Mental Health"	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	Yes, abstract is comprehensive.	
<b>Is the manuscript scientifically, correct? Please write here.</b>	The manuscript is scientifically sound. But in text reference are not cited. Author must cite the references and newer studies must be included. Limitations of the current evidence could also be discussed.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	<p>References are relevant but new studies should be cited. Many new studies are available which discussed the study on depth. All the references must be cited in the manuscript to avoid plagiarism. Some of the references mentioned could not found online and hence must be checked again for authenticity. Links for those references may be included.</p> <p><b>New and additional references that may be referred:</b></p> <ol style="list-style-type: none"> <li>Sarkar, S., &amp; Sarkar, S. (2024). 	3. Felice, J., et al. (2020). "The effects of dietary patterns on depression: A systematic review."	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	The language is suitable for scientific communication. However, the text patterns resemble AI text.	
<b>Optional/General</b> comments	The manuscript lacks critical evaluation of the available literature. It primarily summarizes existing studies without offering any new insights. The authors must critically review the literature and also cite the references in text. I declare no competing interest. Since references are not cited in text, almost the entire manuscript seems plagiarised.
