Journal Name:	<a href="#">Advances in Research</a>
Manuscript Number:	Ms_AIR_128624
Title of the Manuscript:	Comparison of Rice plant Microbiomes in environment of Rice Yellow Mottle Virus infection in Mali
Type of the Article	Research Article

**PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript explores the microbial changes caused by RYMV infection in Mali and provides insights into potential bio-control strategies, contributing to rice cultivation sustainability and food security.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is appropriate. Suggested alternative: "Microbial Dynamics in Rice Plants: Insights from Rice Yellow Mottle Virus Infection in Mali." to focus on microbial dynamics, providing a clearer and more description.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive but could briefly mention statistical significance and emphasize practical biocontrol implications.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically sound but requires clarification on reconciling statistical findings (ANOVA vs PCA).	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Relevant references are available, but adding works on microbial interactions could enhance the depth of the knowledge.	
Is the language/English quality of the article suitable for scholarly communications?	Language is clear, with minor grammatical issues and typographical corrections needed.	
<b>Optional/General</b> comments	A valuable study for plant pathology and sustainable agriculture. Functional validation and broader agro-ecological implications could be explored further.
