	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript addresses a critical issue of inadequate water and sanitation in Afghanistan, which has far-reaching environmental and socioeconomic effects. It highlights the challenges posed by water scarcity, sanitation infrastructure deficiencies, and their cascading impacts on public health, biodiversity, and socioeconomic development. The paper is valuable for the scientific community and policymakers because it offers a detailed evaluation of current conditions and presents recommendations for sustainable development in Afghanistan.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is clear, concise, and reflects the main focus of the manuscript. It is suitable as is. Suggestion: No change required.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive and provides a good overview of the manuscript. However, it could benefit from briefly mentioning the methodology used to gather the data or compile the review to improve clarity. Suggestion: Add a sentence describing the methodology or sources (e.g., systematic review, policy analysis).	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically robust and provides a thorough analysis of the issue. It uses credible sources and recent data to support its claims. The conclusions are logical and based on the evidence presented.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are recent and sufficient. However, consider adding references that focus on successful water and sanitation interventions in similar regions to strengthen the recommendation section. Suggestion: Include references from case studies in South Asia or the Middle East to provide comparative insights.	
Is the language/English quality of the article suitable for scholarly communications?	The language is suitable for scholarly communication, but there are minor grammatical and syntactical errors that need correction. Suggestion: A thorough proofreading by a native English editor or software-based grammar check would enhance readability.	
Optional/General comments	The manuscript is well-structured and presents valuable recommendations. Adding graphical representations (such as flowcharts or tables) for the proposed interventions could make the findings more accessible to readers.
