Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The paper addresses concerns relating migration, environmental degradation, and land use dynamics in the context of climate change and security crises. However, there are certain drawbacks which in my opinion if included would render a more insightful analysis: 1. The introduction lacks a stronger global comparative perspective. Linking the findings to similar dynamics in other Sub-Saharan or global contexts would strengthen its academic relevance. 2. The choice of six villages and a sample size of 60 participants is not adequately justified. Explain why this sample is representative of the entire commune. 3. Incorporate global and regional case studies can expand the literature review section. 4. The conclusion is concise but does not sufficiently address future directions or recommendations. Highlighting actionable steps, such as policy changes, sustainable land management practices, or conflict resolution mechanisms, would increase its impact.	
Is the title of the article suitable? (If not please suggest an alternative title)	YES	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract effectively summarizes the paper's objectives, methodology and key findings. However, it could briefly mention why this study is significant in a broader context.	
Is the manuscript scientifically, correct? Please write here.	There is lack of a data validation. Like, the findings are not corroborated with any historical data.
