**PART 1: Comments**

	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	This manuscript contributes significantly to the scientific community by addressing the crucial topic of safety training, behavior, and performance in the oil and gas industry, specifically in the Niger Delta region. The study offers practical insights into the effectiveness of teaching-based and practical-based training programs, emphasizing their impact on safety compliance, participation, and accident reduction. Such research fills a critical gap in the literature and provides actionable recommendations for improving workplace safety in high-risk industries.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	The title " <b>MODELING SAFETY TRAINING, BEHAVIOUR AND PERFORMANCE IN SELECTED OIL AND GAS COMPANIES IN NIGER DELTA</b> " is appropriate as it clearly reflects the study's scope and objectives. However, an alternative suggestion for better clarity could be: "Assessing the Impact of Safety Training on Behavior and Performance in Oil and Gas Firms: A Case Study of the Niger Delta."	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	The abstract is comprehensive, covering the study's objectives, methodology, key findings, and recommendations. However, it could benefit from explicitly highlighting the practical implications of the results to further engage practitioners and policymakers. Additionally, minor grammatical improvements could enhance its readability.	
<b>Is the manuscript scientifically, correct? Please write here.</b>	The manuscript appears scientifically sound, with well-structured methodologies and robust data analysis.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	The references cited are relevant and support the study's findings. However, to strengthen the paper, the authors may consider including more recent studies from the past five years that align with the topic.	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	The language used is generally clear and suitable for scholarly communication, but minor grammatical errors and repetitive phrases need to be revised for improved clarity and fluency.	
<b>Optional/General</b> comments	The discussion could benefit from a deeper exploration of the managerial implications of integrating safety training programs. Visual representations, such as graphs or charts for data analysis, could enhance the manuscript's readability and engagement. The manuscript is well-prepared and presents valuable findings. However, addressing the minor issues outlined above will enhance its overall quality and impact.
