Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Understanding teaching-based safety training and practical based safety training is important because they complement each other in ensuring optimal workplace safety. Teaching provides an understanding of the theories, rules, and procedures underlying safety. Without this knowledge, it is difficult to understand why certain safety measures are necessary. Practice allows for direct application of theory, ensuring workers know how to act in real situations. Instruction-based training ensures workers are aware of safety procedures and the risks involved. Practice-based training ensures workers are able to apply that knowledge correctly to avoid accidents or injuries. By combining theory and practice, organizations can create a strong safety culture, where every individual understands their responsibility for safety.	
Is the title of the article suitable? (If not please suggest an alternative title)	My suggestions for appropriate titles include: 1. "Analyzing the Impact of Safety Training on Behavior and Performance in Oil and Gas Companies in the Niger Delta" 2. "Safety Training, Behavior, and Performance: A Study of Selected Oil and Gas Companies in the Niger Delta"	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It is recommended that the abstract at the end be added by Improving the Effectiveness of Safety Training by Combining teaching and practice to produce comprehensive training, where participants not only know what to do, but are also able to do it well. The combination of the two is critical to building an effective safety culture, especially in high-risk industries like oil and gas.	
Is the manuscript scientifically, correct? Please write here.	The title of the manuscript is very interesting to research and compare	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	It would be best to add references from the last 5 years and add regulations regarding work safety	
Is the language/English quality of the article suitable for scholarly communications?	The quality of the language in this article is good	
<u>Optional/General</u> comments	This manuscript is very good, so that all companies can understand that the function of work safety for companies includes protecting employees, optimizing operational efficiency, and maintaining legal compliance and company reputation. Investing in workplace safety is not only a moral responsibility but also a smart business strategy to ensure a company's long-term sustainability and success.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
