PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable insights into the etiology of liver cirrhosis, focusing on a tertiary healthcare setting in Bangladesh. By identifying the leading causes of cirrhosis in this specific population, the study fills a crucial knowledge gap and contributes to the global understanding of liver disease patterns in South Asia. The findings could have significant implications for public health strategies, early diagnosis, and prevention efforts in regions with similar epidemiological profiles. Additionally, the research could inform healthcare policies, assist in resource allocation, and guide further studies aimed at reducing the burden of liver cirrhosis in Bangladesh and comparable settings.	
Is the title of the article suitable? (If not please suggest an alternative title)	We can use (From the Heart of Bangladesh: Groundbreaking Study Reveals Key Factors Behind Liver Cirrhosis) or (Liver Cirrhosis in Bangladesh: A Comprehensive Investigation from a Tertiary Care Center). Because it is more interesting for the reader.
