

**Editor's Comment:**

Thanks very much for sending the reviewed manuscript (2024/ARRB/128146) for giving a final decision. I am very glad to evaluate this interesting piece of research paper and found that the authors have done good jobs in revising their manuscript based on the majority of the scholastic comments/suggestions given by the reviewers as well as improving the manuscript in a worthwhile manner. However, there are still some ways that the words and languages can be improved tables, figures, citations and references need to be formatted/arranged and revised based on the prescribed guidelines of the journal before final printing. Therefore, I recommend this paper for publication in "Annual Research & Review in Biology", with minor revisions as suggested above.
