

Review Form 3

| | |
|--------------------------|---|
| Journal Name: | Advances in Research |
| Manuscript Number: | Ms_AIR_128466 |
| Title of the Manuscript: | Research Status and Prospect of Steel Frame-Infill Wall Structure |
| Type of the Article | Opinion Article |

PART 1: Comments

| | Reviewer's comment | Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|---|---|---|
| Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part. | This kind of research is important for the following reasons: Advancing structural engineering knowledge, promoting safer construction prospects, improving material efficiency, shaping future research, encouraging to work on practical applications, contributing to sustainable development as well as encouraging multi-disciplinary research. | Thank you for your encouraging words. They mean a lot. |
| Is the title of the article suitable? (If not please suggest an alternative title) | A Literature Review based Research Status and Prospect of Steel Frame-Infill Wall Structure | |
| Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here. | Explicit declaration of Problem Statement/Research Objective as a separate section is suggested This activity is not completed | Thank you for your valuable suggestion. |
| Is the manuscript scientifically, correct? Please write here. | Yes! But then some citations are missing. One example of how to bring and quote citations for some important technical statements is shown. For example: If the content is → most of the vertical loads of the structure are borne by the steel frame as a boundary member, while some of the horizontal shear forces are synergistically and jointly borne by the steel frame and the concrete wall panels Two citations can be brought as follows: Zhou et al. (2018) from Journal of Building Structures and Li and Wang (2019) from China Civil Engineering Journal | New citations have been added. |
| Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. | Most recent as per the list of references seen is only year 2019. Author has to put effort in bringing the most recent references between 2020-2024 too. | |
| Is the language/English quality of the article suitable for scholarly communications? | No not much suitable. Very big sentences are seen. They require breakup rationally. | |
| Optional/General comments | Overall there, it is required to go and see what are the various citation styles available in research methodology and how too work on finding research gaps | |
