

Review Form 3

Journal Name:	Advances in Research
Manuscript Number:	Ms_AIR_128466
Title of the Manuscript:	Research Status and Prospect of Steel Frame-Infill Wall Structure
Type of the Article	Opinion Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This kind of research is important for the following reasons: Advancing structural engineering knowledge, promoting safer construction prospects, improving material efficiency, shaping future research, encouraging to work on practical applications, contributing to sustainable development as well as encouraging multi-disciplinary research.	
Is the title of the article suitable? (If not please suggest an alternative title)	A Literature Review based Research Status and Prospect of Steel Frame-Infill Wall Structure	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Explicit declaration of Problem Statement/Research Objective as a separate section is suggested	
Is the manuscript scientifically, correct? Please write here.	Yes! But then some citations are missing. One example of how to bring and quote citations for some important technical statements is shown. For example: If the content is → most of the vertical loads of the structure are borne by the steel frame as a boundary member, while some of the horizontal shear forces are synergistically and jointly borne by the steel frame and the concrete wall panels Two citations can be brought as follows: Zhou et al. (2018) from Journal of Building Structures and Li and Wang (2019) from China Civil Engineering Journal	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Most recent as per the list of references seen is only year 2019. Author has to put effort in bringing the most recent references between 2020-2024 too.	
Is the language/English quality of the article suitable for scholarly communications?	No not much suitable. Very big sentences are seen. They require breakup rationally.	
<u>Optional/General</u> comments	Overall there, it is required to go and see what are the various citation styles available in research methodology and how too work on finding research gaps	

Comment [L1]: Needs citation and write it as a separate sentence
e.g. **Zhou et al. (2018)**, published in the *Journal of Building Structures*, and **Li and Wang (2019)**, in their article in the *China Civil Engineering Journal*,

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
