

Review Form 3

Journal Name:	Asian Journal of Pediatric Research
Manuscript Number:	Ms_AJPR_128019
Title of the Manuscript:	The relation between Inotrope uses and Occurrence of Intraventricular Hemorrhage in Preterm Neonates
Type of the Article	Review Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Intraventricular hemorrhage(IVH) is a significant morbidity in very low gestational age infants as is the hemodynamic instability that occurs during the transitional from fetal to neonatal circulation.Accurate measurement of blood pressure and inotropic support for low blood pressure below 5 th centile to ensure hemodynamic stability is essential.IVH can lead to Hypotension and inotropic use causing rapid changes in blood pressure and cerebral blood flow can cause IVH. Exploring the relation between the two entities-Inotropic use and IVH can give valuable insights and can have impact on improving preterm care to ensure "intact survival".	
Is the title of the article suitable? (If not please suggest an alternative title)	No Impact of inotropic use on occurrence of IVH in early preterm infants	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No Explain the objective of the review concisely and need to give clarity as the second and third sentence of the abstract seem contradictory statements. Explain the concept as explained above in importance of this manuscript.	
Is the manuscript scientifically, correct? Please write here.	Not very correct	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	

Review Form 3

Is the language/English quality of the article suitable for scholarly communications?	No , grammar needs improvisation	
Optional/General comments	<p>In Page 2 ,Introduction section : References are not serially numbered (Ref no 22,23 after 1 and 20,21 after ref no 2 etc) Correction : Arrange references in sequential serial numbers</p> <p>In Page 3,sub section intraventricular hemorrhage , paragraph begins with the sentence The global prevalence of peripheral viral hepatitis ranges from 3.70% to 44.68%.This needs to change and prevalence of IVH should be quoted .</p> <p>In sub section Risk Factors second and third sentences are incomplete and are grammatically incorrect.Last sentence should have reference number instead of author name.</p> <p>After the last sub section,concise conclusion needs to be mentioned.</p> <p>Bibliography: reference is not in any one particular reference style and the styles are all jumbled up while presenting the referenes.Follow on the referencing style mentioned in"Author Guidelines of this journal.</p> <p>Overall,the review needs to quote more substantial systematic reviews,meta analysis to improve the scientific quality of the manuscript.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
