

### Review Form 3

Journal Name:	<a href="#">Asian Journal of Research in Nursing and Health</a>
Manuscript Number:	Ms_AJRNH_128569
Title of the Manuscript:	COMPARATIVE ANALYSIS OF COVID-19 PREVENTION STRATEGIES AMONG DIFFERENT CHRISTIAN DENOMINATIONS IN PORT HARCOURT, RIVERS STATE, NIGERIA.
Type of the Article	

#### PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	The article focuses on the impact of denominational affiliation on COVID-19 control measure adherence in Port Harcourt, Nigeria. I presume this is possibly the only scientific work done for a particular geographic location on COVID-19 and its faith communities. The analysis and discussion appraise its readers about the difference among different Christian denomination in Port Harcourt. This article can be considered as a baseline or reference point in case of future similar research.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	<b>The title is sound. Still following two can be alternatives:</b> <ul style="list-style-type: none"> <li>- Adherence to COVID-19 Preventive Measures: A Comparative Study of Christian Denominations in Port Harcourt, Nigeria</li> <li>- Religious Beliefs and COVID-19 Mitigation Strategies: A Comparative Analysis of Christian Denominations in Port Harcourt, Nigeria</li> </ul>	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	The abstract includes some details of methodology and sampling, which may seem repetitive. It may focus on capturing the essence of the research, making it accessible to a broad audience, including non-experts. The article may refer to some of the religious scripts in relations to pandemic outbreak and measures promoted, which may relate to the behaviour, practice and attitude discussed in the manuscript.	
<b>Is the manuscript scientifically, correct? Please write here.</b>	The manuscript follows a scientific approach, outlining the research problem, objectives, and hypotheses. It employs SPSS for data analysis, presenting the results and discussing their implications. The recommendations, while sound, could be further tailored to align more closely with the specific findings, particularly the significant differences observed among denominations.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	Only 13 references are mentioned in the article. There are literatures on role of faith leaders and organizations during COVID-19 response. Author may consider referring some of those as part of literature review.	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	Language needs further attention to enhance the readability. At page 3, paragraph 2, planet is used for referring to World of WHO.	
<b>Optional/General</b> comments	Some of the acronym used needs elaborations on their first appearances e.g.: ANOVA, RNA
