Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript addresses a critical gap in understanding why responses to clomiphene citrate therapy vary among men with hypogonadism and infertility by identifying key pre-treatment predictors, such as hormone levels and testicular volume. This research offers valuable insights for clinical decision-making and can lead to more personalized patient selection strategies, ultimately improving therapeutic outcomes in male infertility management. Additionally, it highlights the need for further prospective studies to validate these predictors, thus paving the way for future research and enhancing collective knowledge in the field of male reproductive health.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title "Predictors of Inadequate Response to Clomiphene Citrate Therapy in Male Hypogonadism and Infertility" is suitable in that it accurately reflects the focus of the article on identifying factors that influence the effectiveness of clomiphene citrate therapy in men experiencing hypogonadism and infertility. However, to enhance clarity and appeal, I would suggest a revised title: Identifying Factors Predicting Response to Clomiphene Citrate in Male Hypogonadism and Infertility This alternative title emphasizes the proactive aspect of identifying predictors and may attract a wider audience interested in the implications for clinical practice.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Not applicable	
Is the manuscript scientifically, correct? Please write here.	Yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Is the language/English quality of the article suitable for scholarly communications?	Yes	
<u>Optional/General</u> comments	Overall, the letter effectively outlines a significant issue in the treatment of male hypogonadism and infertility, proposes a feasible solution, and highlights the potential benefits of such an approach in clinical practice.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
