

### Review Form 3

Journal Name:	<a href="#">Asian Research Journal of Mathematics</a>
Manuscript Number:	Ms_ARJOM_128331
Title of the Manuscript:	Generalized stability of a general quartic functional equation
Type of the Article	Original Research Article

#### **General guidelines for the Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

<https://r1.reviewerhub.org/general-editorial-policy/>

#### **Important Policies Regarding Peer Review**

Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

**Review Form 3**

**PART 1: Comments**

	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	<b>This article is considered an extension of studies in the field of stability of various functional equations, including the quartic functional equation, which is also one of the important equations used in several fields. Therefore, this article is of good scientific importance.</b>	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	<b>No, I suggest that (Generalized stability of a general quartic functional equation in normed space)</b>	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	The abstract is an important part of the paper. Before the main body, the purpose of the abstract is to let readers understand the full text briefly. Please add the method of studying the stability of the quartic equation in this paper (as fixed point method, direct method or any method) and also determine the space which is used.	
<b>Is the manuscript scientifically, correct? Please write here.</b>	Yes, its correct.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	Some references exist but not used as cite[1], I think that the references is sufficient, please include the digital object identifier (DOI) for all references, if available.	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	Yes, good.	
<b>Optional/General</b> comments	The paper should include the basic concepts as Banach space, normed space, Cauchy sequence, convergent sequence, some definitions and theorems which the author needs in this article. It should explain proof of Lemma 2.3, and determine the references of the previous authors which have been mentioned in this article as author <b>(Y. H. Lee)</b> .	

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

**Reviewer Details:**
