PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable insights into the seasonal trends and epidemiological characteristics of COVID-19 within a primary care setting, an area that has been underexplored in the broader literature. Understanding how the virus behaves in different seasons and how it impacts patients at the primary care level is crucial for improving early detection, patient management, and public health strategies. By focusing on this setting, the study highlights the role of primary care providers in monitoring and responding to COVID-19, which can aid in better resource allocation and preventive measures. Furthermore, this research contributes to refining models of disease transmission and assists in anticipating future surges, thereby supporting more effective public health planning.
